SYO13101	ANATOMY				
Semester	Course Code	Course Name	L+P	Credit	ECTS
1	SYO13101	ANATOMY	4	3	4

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

Macroscopic structures of the human body functions and the importance of vocational training comprehension knowing this information to underpin an application to train midwives.

Teaching Methods and Techniques:

Introduction of anatomy and terminology, Movement system anatomy, Circulatory system anatomy, Digestive system, Urogenital system, Mid-term, exam Respiratory system, Nervous system, Sense organs,

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem TURAN

Instructors:

Instructor Neşe ALPARSLAN

Assistants:

Instructor Özlem ÖZDEMİR

14	Sense organs	Ders öncesi konuyla ilgili kaynakların, d	Önerilen kaynaklar, ders n otları
15	Duyu organları	Ders öncesi konuyla ilgili kaynakların, d	Önerilen kaynaklar, ders n otları

Course Learning Outcomes

No	Learning Outcomes
C01	Have a basic knowledge about the anatomy of the human body to the macroscopic
C02	Anatomy of learning and understanding the terminology of
C03	All systems have knowledge about the functioning and relationships with each other
C04	All systems have knowledge about the functioning and relationships with each other
C05	The importance of anatomical knowledge in professional practice / understand and embrace the need for
C06	The importance of anatomical knowledge in professional practice / understand and embrace the need for

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

EBE13101 PROFESSIONAL BASIS IN MIDWIFERY					
Semester	Course Code	Course Name	L+P	Credit	ECTS
1	EBE13101	PROFESSIONAL BASIS IN MIDWIFERY	4	6	6

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

Examining the basic concepts and rules of professional rules and principles, in accordance with national requirements, the student's individual, family and society, the importance of discipline, the importance of occupational health protection and occupational development, the location, the role and functions, understanding their relationship with other health disciplines, maintenance, correct and appropriate decision in the process of psychomotor development in light of this information, and the ability to provide nursing practices.

Teaching Methods and Techniques:

Medical definitions, basic concepts and rules of the health care system, the health care team, and midwives will be discharged from the hospital environment, the roles of patient acceptance and, nursing process, body mechanics and movement, health protection and infection control, bed making, Body Mechanics and movement. Health protection and infection control, Personal hygiene practices, and the person's care, Oral medication, Parenteral drug applications

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem TURAN

Instructors:

Instructor Muammer Giriş

Assistants:

Instructor Özlem ÖZDEMİR

UNV13105 ENGLISH-I					
Semester	Course Code	Course Name	L+P	Credit	ECTS
1	UNV13105	ENGLISH-I	4	4	4

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

This course aims to provide students with sufficient skills to understand and use familiar everyday expressions and very basic phrases aimed at the satisfaction of needs of a concrete type; to introduce themselves and others and ask and answer questions about personal details such as where they live, people they know and things they have; and to interact in a simple way provided the other person talks slowly and clearly and is prepared to help.

Teaching Methods and Techniques:

"am/is/are; my/your; This is...", "am/is/are; he/she/they - his/her; Questions", "am/is/are; Negatives, questions, and short answers", "Possessive adjectives; possessive 's; have/has; Questions and answers", "Present Simple; I/you/they; a/an", "The Time; Present Simple; he/she/it; Questions and negatives", "Object pronouns; this/that; Questions and answers", "there is/there are, any; Prepositions", "Past Simple - regular and irregular; Questions and negatives; Short answers", "can/can't; Requests and offers", want, like, and would like, "Present Simple and Present Continuous; Questions and negatives"

Prerequisites:

Course Coordinator:

Instructor Fulya KİNCAL

Instructors:

Instructor Aysun BULUNUZ

Assistants:

Course Learning Outcomes	
No	Learning Outcomes
C01	LISTENING: Students will be able to recognize familiar words and very basic phrases concerning myself, my family and immediate concrete surroundings when people speak slowly and clearly
C02	READING: Students will be able to identify familiar names, words and very simple
C03	SPOKEN INTERACTION: Students will be able to interact in a simple way provided the other person is prepared to repeat or rephrase things at a slower rate of speech and help me formulate what I
C04	SPOKEN PRODUCTION: Students will be able to use simple phrases and sentences to describe where I live and people I know
C05	WRITING: Students will be able to write a short, simple postcard, for example sending holiday greetings.
C06	Students will be able to fill in forms with personal details, for example entering my name, nationality and address on a hotel registration form.

Program Learning Outcomes	
No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

SYO13105 MICROBIOLOGY AND PARASITOLOGY					
Semester	Course Code	Course Name	L+P	Credit	ECTS
1	SYO13105	MICROBIOLOGY AND PARASITOLOGY	2	3	4

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

Micro-organisms and parasites and cellular morphological characteristics, laboratory diagnosis, pathogenesis and prevention methods to teach. Find general information about immunology. General information about the ways to teach and prevention of infectious diseases.

Teaching Methods and Techniques:

Mikrobiyolojiye giriş ve kısa tarihçesi, mikroorganizmaların genel özellikleri, Mikroorganizmaların kimyasal yapısı, metabolizması ve genetiği, mikroorganizmaların beslenmesi ve üretilmesi, mikrop-organizma ilişkileri, enfeksiyon hastalıklarının tanısında kullanılan klinik materyaller, enfeksiyon hastalıklarında tanı yöntemleri, kemoterapötik maddeler ve bunlara karşı oluşan direnç mekanizmaları, dezenfeksiyon ve sterilizasyon yöntemleri, immunolojiye giriş ve genel bilgiler, tıbbi önemi olan bakteriyel, viral, fungal ve paraziter etkenler

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem Turan

Instructors:

Instructor Hülya Arkan

Assistants:

Instructor Özlem Özdemir

Course Content

Week	Topics	Study Materials	Materials
1	Introduction to microbiology, bacterial morphology and general characteristics of the	The student will read notes which given lecture notes	
2	Production of micro-organisms, Metabolism, Genetics and Antimicrobial Agents	The student will read notes which given lecture notes	
3	Impact Foreign media on Microorganisms; Sterilization and Disinfection	The student will read notes which given lecture notes	
4	Environmental Microbiology, Normal Flora, microbiology lab, sampling sending	The student will read notes which given lecture notes	
5	Introduction to immunology, antigens, Immune System Structure and Immunoglobulinler	The student will read notes which given lecture notes	
6	Immune Response	The student will read notes which given lecture notes	
7	Immunity to infections; Vaccines and Serums	The student will read notes which given lecture notes	
8	Ara sınav		
9	Importance of hospital infections and Midwifery,	The student will read notes which given lecture notes	
10	Microbiological Diagnostic Methods	The student will read notes which given lecture notes	
11	Gram-positive and Gram-negative bacteria that cause disease in humans	The student will read notes which given lecture notes	
12	Blood and Blood Products, Safe Blood Transfusion	The student will read notes which given lecture notes	
13	Parasitology, Parasite and Parasitism	The student will read notes which given lecture notes	
14	Protozoa and Helminths	The student will read notes which given lecture notes	
15	Communicable Disease Prevention	The student will read notes which given lecture notes	

Course Learning Outcomes

No	Learning Outcomes
C01	The morphology of microorganisms, reproductive patterns and environments able to identify
C02	Microorganisms and parasites can identify with microscopic structures.
C03	General characteristics of fungi, yeasts, and molds, which knows the importance of medical,
C04	Microorganisms, the ways of transmission of diseases, clinical signs of infections they create should be able to count
C05	Introduction to parasitology, protozoa, nematodes, cestodes, flukes knows,
C06	Sterilization, disinfection and antisepsis should be able to define the concepts
C07	Microorganisms, the ways of transmission of diseases, clinical signs of infections they create should be able to count
C08	Infections of caused by microorganisms and parasites know the ways of protection.

PSL13151		PSYCHOLOGY			
Semester	Course Code	Course Name	L+P	Credit	ECTS
1	PSL13151	PSYCHOLOGY	2	2	2

Language of Instruction:

English

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

It is aimed to introduce students with the scientific study of Psychology and its various branches. It is aimed to make it possible for students to understand the historical roots of psychology, and basic research methods in psychology. Also, students are provided with theoretical and methodological information about special topics of psychology (Physiology and Behavior, Sensation and Perception, Altering States of Consciousness, Learning, and Cognitive Abilities). In doing so, students are aimed to gain a general idea about the vision of psychology as a science and to be able to grasp terms and concepts in some sub-disciplines of Psychology.

Teaching Methods and Techniques:

verbal lecture, written exam

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem Turan

Instructors:

Instructor Gülsüm Mehdiyev

Assistants:

Course Content

Week	Topics	Study Materials	Materials
1	Language theories, the birth of language and language-culture relationship.	Reading and evaluating. Articles, studies	Reading and evaluating. Articles, studies
2	Relationship with language-thought and language-society, language-literature.	Reading and evaluating. Articles, studies	Reading and evaluating. Articles, studies
3	Language-culture relationship.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
4	The classification of languages, with special emphasis on the Ural-Altaic language family, to which the Turkish language belongs.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
5	The work of terms: mother tongue, dialects, accent, jargon.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
6	Development of Turkish written language and historical time line.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
7	Actual state of Turkish language and deployment range.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
8	Atatürk's linguistic policy and "Sun-Language Theory".	Analyzing and preparing of the texts	Analyzing and preparing of the texts
9	MID TERM.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
10	The phonetic structure of Turkish.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
11	The morphological structure of Turkish.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
12	The morphological structure of Turkish.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
13	The syntax and semantics structure of Turkish.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
14	Actual problems of Turkish.	Analyzing and preparing of the texts	Analyzing and preparing of the texts
15	Actual problems of Turkish.	Analyzing and preparing of the texts	Analyzing and preparing of the texts

Course Learning Outcomes

No	Learning Outcomes
C01	Defines the basic concepts of language and Turkish language.
C02	Explains the elements of the Turkish language.
C03	Implements research, reading, writing implements, and informing abilities.
C04	Distinguishes the differences between the Turkish language and other languages.
C05	Grasps the importance of using correct language in the communication reaches generalizations.
C06	Evaluates the elements that make up the Turkish language.

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

13	Vitamins and Minerals	source browsing	lecture notes
14	Biological sample test collection.	source browsing	lecture notes
15	Final Exam		

Course Learning Outcomes

No	Learning Outcomes
C01	Student knows the properties of water and the pH.
C02	Defines the basic properties of carbohydrates and lipids.
C03	Students, amino acid, protein and nucleic acid structure and metabolism summaries.
C04	Defines the structure of enzymes and coenzymes.
C05	Defines the structure of vitamins and minerals.
C06	Defines the energy metabolism.
C07	Defines the blood collection techniques, makes the selection of appropriate for the sample tube.

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening

EBE13102 BASIC PRINCIPLES AND PRACTICES IN MIDWIFERY					
Semester	Course Code	Course Name	L+P	Credit	ECTS
2	EBE13102	BASIC PRINCIPLES AND PRACTICES IN MIDWIFERY	12	8	8

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

Yes

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

Fulfill the requirements of the profession of midwifery professionals, individuals and community health-care needs of diseases in accordance with modern approaches evaluate.basic knowing the principles and methods of patient care in clinical practice, the necessary knowledge, skills and behaviors to gain

Teaching Methods and Techniques:

Preoperative and postoperative Parenteral drug applications again, care, respiratory system applications Applications of the digestive system, urinary system applications hot-cold-sleep-Pain the rest of the applications in the Terminal period of patient care, the concept of death.

Prerequisites:

(EBE13101)

Course Coordinator:

Prof.Dr. Mehmet cem TURAN

Instructors:

Instructor Muammer GERİŞ

Assistants:

Instructor Özlem Özdemir

Course Learning Outcomes	
No	Learning Outcomes
C01	Making Drug applications
C02	Making Patient Care
C03	Respiratory, digestive and urinary system related to nursing practice
C04	- Hot and cold applications to
C05	Application of the process of patient care
C06	Approach and taking care of patients in the terminal stage of knowing

Program Learning Outcomes	
No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

STAJ13001 BASIC PRINCIPLES AND APPLICATIONS SUMMER INTERNSHIP IN MIDWIFERY					
Semester	Course Code	Course Name	L+P	Credit	ECTS
2	STAJ13001	BASIC PRINCIPLES AND APPLICATIONS SUMMER INTERNSHIP IN MIDWI	0	0	4

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

Examining the basic concepts and rules of professional rules and principles, in accordance with national requirements, the student's individual, family and society, the importance of discipline, the importance of occupational health protection and occupational development, the location, the role and functions, understanding their relationship with other health disciplines, maintenance, correct and appropriate decision in the process of psychomotor development in light of this information, and the ability to provide nursing practices.

Teaching Methods and Techniques:

Pharmaceutical applications. Preoperative-postoperative care. respiratory system applications. Digestive system applications. Urinary system applications. Hot and cold applications.

Maintenance of terminal illness and death, the concept of harvest

Prerequisites:

(EBE13101)

Course Coordinator:

Prof.Dr. Mehmet Cem Turan

Instructors:

Instructor Muammer A. GERİŞInstructor Zülfiye BIKMAZ

EBE13104 EMBRYOLOGY-GENETICS					
Semester	Course Code	Course Name	L+P	Credit	ECTS
2	EBE13104	EMBRYOLOGY-GENETICS	2	2	2

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

The development of the embryo is called embryogenesis. In organisms that reproduce sexually, once a sperm fertilizes an egg cell, the result is a cell called the zygote, which possesses half the DNA of each of its two parents. In plants, animals, and some protists, the zygote will begin to divide by mitosis to produce a multicellular organism. The result of this process is an embryo.

Teaching Methods and Techniques:

Embriyoloji ve genetik bilgiler, intrauterin hayat, fetal dönem ve gelişim haftaları, hayatın oluşumu ve gelişimi, anomaliler.

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem Turan

Instructors:

Prof.Dr. Mehmet Cem Turan

Assistants:

Instructor Özlem Özdemir

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

The aim of the course is to help the professionals to be employed in the field of health to understand the normal microscopic structure of the human body, to learn normal histology to be able to understand the pathological changes in this structure emerging due to disease, and to conceive the microscopic morphological structure in which the physiological phenomena take place.

Teaching Methods and Techniques:

Definition of histology, histology and microscopic methods, introducing the cell's structural properties, macroscopic structure alignment with the cell membrane and cytoplasm, the core, the nucleolus and cell organelles, Tissue general characteristics and tissue types.

UNV13106 ENGLISH-II					
Semester	Course Code	Course Name	L+P	Credit	ECTS
2	UNV13106	ENGLISH-II	4	4	4

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

This course aims to provide students with sufficient skills to understand sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal and family information, shopping, local geography, employment); to communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar and routine matters; and to describe in simple terms aspects of their background, immediate environment and matters in areas of immediate need.

Teaching Methods and Techniques:

Dates to remember, Eat in or out?, City living, Where on earth are you?, Going far, Never ever!

Prerequisites:

Course Coordinator:

Instructor Fulya KİNCAL

Instructors:

Instructor AYSUN BULUNUZ

Assistants:

Course Learning Outcomes	
No	Learning Outcomes
C01	LISTENING:Students will be able to analyse phrases and the highest frequency vocabulary related to areas of most immediate personal relevance (e.g. very basic personal and family information, st
C02	READING: Students will be able to read very short, simple texts and find specific, predictable information in simple everyday material such as advertisements, prospectuses, menus and timetables
C03	INTERACTION: Students will be able to communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar topics and activities and handle very sh
C04	SPOKEN PRODUCTION: Students will be able to list a series of phrases and sentences to describe in simple terms my family and other people, living conditions, my educational background and my
C05	WRITING: Students will be able to write short, simple notes and messages relating to matters in areas of immediate needs.
C06	Students will be able to make up a very simple personal letter, for example thanking someone for something.

Program Learning Outcomes	
No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

Course Learning Outcomes

No	Learning Outcomes
C01	To understand the importance of women's health
C02	To know the anatomy and physiology of the female reproductive system
C03	Development of the fetus during pregnancy and the mother's physiology to know the changes
C04	Parenting women and families to prepare
C05	To know the process of normal pregnancy situations
C06	Be able to examine pregnant women

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

SYO13201 PHARMACOLOGY					
Semester	Course Code	Course Name	L+P	Credit	ECTS
3	SYO13201	PHARMACOLOGY	2	2	2

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

Students will know the follows: active ingredients, effects, side effects, important points during drug administration, the complications due to drugs Students will have enough information to teach patient and patient relatives about drug administration and important points during drug administration

Teaching Methods and Techniques:

Introduction to pharmacology and drug delivery routes, the drug in the body results, mechanisms of drug action, antibiotics, vitamins, diuretics and systems used in drugs, drug abuse and drug addiction, acute poisoning and Treatment Methods

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem Turan

Instructors:

Prof.Dr. HACI MEHMET SÖKMEN

Assistants:

Instructor Özlem Özdemir

EBE13203 INTERNAL MEDICINE INFORMATION					
Semester	Course Code	Course Name	L+P	Credit	ECTS
3	EBE13203	INTERNAL MEDICINE INFORMATION	7	5	6

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

Yes

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

This lesson contains knowledge and applications to make decisions and practice about the care of patients who have internal diseases.

Teaching Methods and Techniques:

Introduction to medical issues- Basic definition, Fluid-electrolyte balance/imbalance, acid-base balance/imbalance, Universal precautions in infectious diseases , Shock and care, Bed-bound patients and care of them, pain and patient's care, neoplastic diseases and care, respiratory system diseases and care, Cardiovascular disease and care, Endocrine system disorders care, Hematologic System disorders and care, Gastrointestinal system diseases and care, Neurological diseases and care, Locomotor system diseases and Care, Urinary system diseases care, Immune system disorders and care

Prerequisites:

(EBE13102)

Course Coordinator:

Prof.Dr. Mehmet Cem Turan

Instructors:

Associate Prof.Dr. Ayşe ÇİL AKINCI

Assistants:

Instructor Özlem Özdemir

Course Content

Week	Topics	Study Materials	Materials
1	Introduction to lesson-basics definitions	The student will read notes which given Notes of teaching staff	
2	Fluid-electrolyte balance / imbalance, acid-base balance/imbalance	The students will read notes which given Notes of the teaching staff	
3	Shock and care	The students will read notes which given Notes of the teaching staff	
4	Universal precautions, Care of the patients who bed-bounded	The students will read notes which given Notes of the teaching staff	
5	Cancer and care, Pain and care of patient with pain	The students will read notes which given Notes of the teaching staff	
6	Respiratory system disorders and care	The students will read notes which given Notes of the teaching staff	
7	Cardiovascular Disease and Care	The student will read notes which given Notes of teaching staff	
8	Mildterm exam		
9	Endocrine System Disorders and Care	The student will read notes which given Notes of teaching staff	
10	Hematologic System Disorders and Care	The student will read notes which given Notes of teaching staff	
11	Gastrointestinal System Diseases and Care	The student will read notes which given Notes of teaching staff	
12	Neurological Diseases and Care	The student will read notes which given Notes of teaching staff	
13	Locomotor system diseases and Care	The student will read notes which given Notes of teaching staff	
14	Urinary System Diseases and Care	The student will read notes which given Notes of teaching staff	
15	Immune System Diseases and Care	The student will read notes which given Notes of teaching staff	

Course Learning Outcomes

No	Learning Outcomes
C01	The students can explain basic definition about internal medicines
C02	The students can explain the reasons of fluid-electrolyt imbalance, symptoms, treatments and nursing care of the patients who have fluid electrolyt imbalance
C03	The students should have the information about acid-base imbalance, causes, symptoms, treatments and the ability for nursing care of the patients who have acid base imbalance.
C04	The students know universal precaution and protect himself/herself from infectious diseases
C05	The students know shock types, causes, symptoms, treatments and the students can make nursing care of this patients
C06	The student know the problems in bed-bounded patients and the students can take care of patient who bed-bounded
C07	The students knows, pain diagnosis, treatments and the students make care of the patients who have pain
C08	The students know chronic diseases, symptoms, treatments and the students make care of the patients who have chronic diseases

Program Learning Outcomes

1	introduction of pathology		
2	Pathology sections and methods		
3	cellular damage and death		
4	Cellular degeneration		
5	tissue necrosis		
6	Accumulation of mineral matter in the tissues, Pigmentation		
7	Physiology of circulation system		
8	genetic disorders and mutations, Eugenics		
9	Midterm exam		
10	Blood and circulatory disorders		
11	Angiogenesis and carcinogenesis		
12	Reproductive organs and inflammation		
13	Liver and bilier tract pathologies		
14	Developmental pathological changes		
15	Inflammation, mechanism and causes		

Course Learning Outcomes	
No	Learning Outcomes
C01	To understand under the influence of harmful factors to the live shows of his body against the effects of these reactions and the resulting structural changes and functional disorders.
C02	Understanding the diseases and disorders caused by changes in the body's tissues and organs know,
C03	Be able to recognize changes of tissues and organs, and can be seen,
C04	Detect changes in the structure and functions and integrate them with the sick person
C05	Genel tümör patolojisini kavrayabilme

Program Learning Outcomes	
No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

SYO13206 RESEARCH METHODS AND BIOSTATISTICS					
Semester	Course Code	Course Name	L+P	Credit	ECTS
4	SYO13206	RESEARCH METHODS AND BIOSTATISTICS	3	3	4

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

In this lesson we aimed to study research in midwifery and health sciences.

Teaching Methods and Techniques:

Basic theories in research, problem based research, research and problem in health, analyze and istatistics methods, writing a sceintific paper.

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem TURAN

Instructors:

Instructor Gülsün MEMİ

Assistants:

Instructor Özlem ÖZDEMİR

Course Content

Week	Topics	Study Materials	Materials
1	Research process. Literature sources		
2	How to read a scientific paper. What should be in a scientific paper		
3	Data collection. instrumentsThe validity, reliability, specificity, sensitivity,		
4	Population and sample. The sample sizedetection. sampling methods		
5	Descriptive criteria, parametric tests of significance		
6	non-parametric tests		
7	Sample application and studies		
8	Ara Sinav		
9	Research Sources of Error		
10	Research ethics and research report writing		
11	The table and graph drawing		
12	Reporting and writing		
13	article critique		
14	presentation of the project		
15	presentation of the project		

Course Learning Outcomes

No	Learning Outcomes
C01	Understand and use the istatistical terms.
C02	To make research in health care
C03	Planned a research according to sceintific process.
C04	Learning of Analytic thinking
C05	To be able to criticizing an article

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

EBE13301 CHILD HEALTH AND DISEASES-I					
Semester	Course Code	Course Name	L+P	Credit	ECTS
5	EBE13301	CHILD HEALTH AND DISEASES-I	12	8	10

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

Yes

Department / Program:

MIDWIFERY

Course Type:

Zorunlu

Goals:

Protection and development of children's health, healthy, unhealthy status of children and recognition, students gain the competence to make child-specific applications.

Teaching Methods and Techniques:

The purpose of the child care that midwives, features, functions, Child-specific applications, Growth and development, Neuro-motor development, Growth and development disorders and care, Nutrition in childhood, Mid-term exam, Routine vaccines, Special vaccines, Normal newborn characteristics and care, Risk newborns and nursing care, Neonatal diseases and nursing care.

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem TURAN

Instructors:

Instructor NEŞE ALPARSLAN

Assistants:

Instructor Özlem Özdemir

Course Learning Outcomes

No	Learning Outcomes
C01	Midwife's role and functions of knowing that the child care
C02	Family and the environment as a whole to address child
C03	The ability to make child-specific applications
C04	Knowing that the child's growth and development process of evaluation
C05	Understanding the role of children commonly encountered disorders / diseases, early diagnosis, treatment and care
C06	Healthy / patient care through the nursing process to evaluate and give newborns
C07	Give health education and counseling to children and families gain skills in

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

Course Content

Week	Topics	Study Materials	Materials
1	Factors in the act of birth		Lecture Notes and Textbooks
2	Physiology of labor		Lecture Notes, on posters action
3	Stages of labor		Lecture Notes, on posters action
4	Follow-up and care in labor		Lecture Notes, on posters action
5	Anne body's action on this answer		Lecture Notes and Textbooks
6	Mechanism of action-dystocias-Pain Risk of Birth Anomalies and Fetal Distress		Lecture Notes and Textbooks
7	Problems which may arise during the act of birth		Lecture Notes and Textbooks
8	Midterm exam	Questions relating to matters described	
9	The Dangers of hard labor for mother and baby		Lecture Notes and Textbooks
10	Preparation of the mother giving birth complications and Support		Lecture Notes and Textbooks
11	Protest in Normal Birth		Lecture Notes and Textbooks
12	Risk of Birth protest in		Lecture Notes and Textbooks
13	Vacuum, forceps, caesarean section, breech presentation techniques on		Lecture Notes and Textbooks
14	Presentation of assignments and the Course		
15	Presentation of assignments and the Course		

Course Learning Outcomes

No	Learning Outcomes
C01	To explain the physiology of labor
C02	Knowing the factors that play a role in birth
C03	To follow the mother in labor
C04	To be able to care for mothers in labor
C05	To recognize risky labor
C06	Be found in attempts to identify actions at appropriate risk obstetrics midwifery

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service

15	Presentation of assignments and the Course	Revision of the textbook and notes on t	Lecture Notes and Textbooks

Course Learning Outcomes

No	Learning Outcomes
C01	Postpartum period, the individual / family to prepare.
C02	Assess postpartum mothers
C03	In the postpartum period, to provide maternal care
C04	In the postpartum period, to know the risk factors and patient care
C05	To know the physiology of lactation
C06	Know and be able to support the importance of breastfeeding mothers

Program Learning Outcomes

No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

Course Learning Outcomes	
No	Learning Outcomes
C01	the ability to know how to follow the normal pregnancy
C02	The ability to know how to do that in the pursuit of high risk pregnancy
C03	First trimester Down syndrome screening tests ability to
C04	Pregnancy diabetes the ability to crawl
C05	Fetal intrauterine infection and the ability to crawl
C06	Ultrasonography (general information)
C07	The ability to know the family about interventional procedures
C08	Fetal heart rate tests apply

Program Learning Outcomes	
No	Learning Outcome
P04	Capability of knowing the importance of midwifery practices on community health and giving the right service
P13	Ability to provide health education to prevent the most common cancer in women and to let them participate in screening
P03	Skills of holistic care and teaching for the individuals being served with humanist approach and showing empathy
P09	Ability of being aware of the risky pregnancy situations, being able to identify them at an early stage and directing to the relevant fields
P08	Training and direction skills for women in the pre-pregnancy period to conduct health checks
P05	Knowledge and skills about public health, common diseases in the community and treatment/care/rehabilitation of chronic diseases
P12	Ability of health protection and maintaining the health at an optimal level in Menopause
P01	Ability to work effectively as individual and as a medical team member, to take responsibility and to behave in autonomy
P11	Ability of proper assessment of neonatal health and right directing skills after determining risky and pathological conditions
P07	Skills of informing the society and individuals about family planning and labor, monitoring postpartum term and directing to related service areas in risky situations
P10	Capability to route to normal labor if pregnant women are not at risky situations
P06	Capability to take place in education and research studies in order to improve public health
P02	Professional and ethical responsibility consciousness and related skills

SYO13406 PERSONAL HYGIENE AND SANITATION					
Semester	Course Code	Course Name	L+P	Credit	ECTS
8	SYO13406	PERSONAL HYGIENE AND SANITATION	2	2	2

Language of Instruction:

Turkish

Course Level:

Work Placement(s):

No

Department / Program:

MIDWIFERY

Course Type:

Seçmeli

Goals:

This course provides students with the legislation and in accordance with the rules of hygiene to provide personal hygiene, cleaning and disinfection of rules to gain competencies and environmental health of the public health nurse's role and responsibilities is intended to assimilate.

Teaching Methods and Techniques:

Health, hygiene and sanitation concepts, personal health protection measures, physical health, mental health, environmental health, waste, Climate events, weather and air pollution, noise, Ionizing radiation, cemeteries, and damage to health organizations, food sanitation, vectors, the duties and responsibilities of the environmental health public health nurse

Prerequisites:

Course Coordinator:

Prof.Dr. Mehmet Cem Turan

Instructors:

Instructor MUAMMER A. GERİŞ

Assistants:

Instructor Özlem Özdemir
